Dynamic DNS Services

Our trademark service designed for users with dynamic IP addresses. Sign up for service today and avoid paying high prices for a static IP.

Dynamic DNS Pro: Our premium Dynamic DNS upgrade provides 25 additional hosts, access to phone support and logging, and prevents accounts from expiring.

Dynamic DNS Free: Our free DNS tool with many domains to choose from and integrated URL redirection functionality.

Custom DNS: Dynamic DNS service for your own domain (e.g. [www.yourdomain.com](#)) provides stable, reliable and globally redundant DNS hosting for personal and business sites.

We also offer [Dynect® Enterprise DNS Platform](#) with high-end features like automatic failover.

About Services Account Support News

Dynamic DNS Free

Dynamic DNS Free (DDNS) allows you to create a hostname that points to your home or office IP address, providing an easy-to-remember URL for quick access. We also provide an update mechanism which makes the hostname work with your dynamic IP address. **We continue to offer this service free** to the Internet community as we have done so **for nearly 10 years**.

Capabilities and Features

- Get five (5) hostnames in [88 available domains](#) for free.
- Forward web requests or mark host offline for maintenance or downtime.
- Configure MX records for flexible mail routing.
- Update host using [ddns update clients](#) for a wide variety of platforms.
- Modify DNS TTL values for fast propagation or reliable static IP caching.
- Deliver your DNS records to 5 DNS servers in 5 tier-1 datacenters around the globe.
- Query volume up to 64k/1000 queries/month

Our **free industry-leading e-mail support** is ready to help you setup your dynamic or static DNS so you can host a website, remotely connect to your machine, and run a mail server. We also offer other premium features with our [Dynamic DNS Pro service](#).

Screenshot

7. Applying for mainframe domain name, see below pic:

Add New Hostname [↑ Host Services](#)

Note: You currently don't have any active [Dynamic DNS Pro upgrades](#) in your account. You cannot use some of our Host Services features. Paying for an Dynamic DNS Pro upgrade will make this form fully functional and will add several other features.

Hostname: [dvrDNS.org](#)

Wildcard Status: Disabled [\[Want Wildcard support?\]](#)

Service Type: ☒ Host with IP address [\[?\]](#)
☐ WebHost Redirect [\[?\]](#)
☐ Offline Hostname [\[?\]](#)

IP Address:
[Use auto detected IP address 124.90.50.63.](#)
TTL value is 60 seconds. [Edit TTL.](#)

Mail Routing: ☐ Yes, let me configure Email routing. [\[?\]](#)

Hostname: input your domain name in the first frame, select "dvrDNS.org" in the green frame.

Service Status: choose "Host with IP address"

IP Address: Directly click "[Use auto detected IP address 124.90.50.63.](#)" to get mainframe IP in the red frame above.

Set default for other option, then click "Add To Cart" at the right corner.

8. Pay, because it's free domain name, so not need to fill the green frame, directly click "next" as below Pic.

Shopping Cart

Your cart contains **free services only**. You will not be asked for credit card information.

Upgrade Options

Free accounts allow only five Dynamic DNS hosts.

- To add more and enjoy [additional benefits](#) for only \$15.00 per year, [purchase Dynamic DNS Pro](#).
- To get Dynamic DNS for **your own domain**, use [Custom DNS](#).

Dynamic DNS Hosts

zhangduofu.dynDNS.org	-	remove	\$0.00

Host Services

Add New Hostname - Host Update Logs

jufeng.dyndns.org successfully activated.

Hostname	Service	Details	Last Updated
jufeng.dyndns.org	Host	124.90.50.63	Jan. 08, 2010 4:50 AM

Setup DDNS

Choose "DynDns" in the DDNS, select "Enable" as below pic.

The screenshot shows a configuration window titled "Main Menu->System->NetService->DDNS". It contains the following fields:

Field	Value
DDNS Type	DynDns
Enable	<input checked="" type="checkbox"/>
Domain Name	zhangduofu.dvrdns.org
Server Name	members.dyndns.org
Port	80
User Name	zhangduofu
Password	••••••••••

At the bottom right, there are "OK" and "Cancel" buttons.

Domain name: zhangduofu.dvrdns.org

Server name: members.dyndns.org

Port: 80(default)

User name:zhangduofu

Password: the same as in DynDns website

If all above have setup,you can type "ping zhangduofu.dvrdns.org" to check it's successful in your computer(Start->Run->cmd)

Then you can use this web(<http://zhangduofu.dvrdns.org/>) to visit this dvr by IE or CMS.(ensure you have setup router mapping)
